

## Information on Data Generated by the Device (in accordance with the Data Act)

Product Category: Bike

Product Name: Strike Gold

### Data Generated by the Device

Data are generated to enable the user to monitor training parameters.

| Parameter     | Method of Data Generation                              | Data Storage Location           | Data Retention Period                                                                                 | Data Format                                               | Data Volume | User Access to Data                                                                                                 | Data Sharing | Data Export Option | Option to Delete                                                                                                   |
|---------------|--------------------------------------------------------|---------------------------------|-------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|-------------|---------------------------------------------------------------------------------------------------------------------|--------------|--------------------|--------------------------------------------------------------------------------------------------------------------|
| Time          | The device collects data in real time during training. | Local computer memory (EEPROM)* | Stored locally on the device – until a new training session is started or the device is switched off. | -                                                         | -           | Via computer, only until a new training session is started or the device is switched off.                           | No           | No                 | -                                                                                                                  |
| Speed         |                                                        |                                 |                                                                                                       |                                                           |             |                                                                                                                     |              |                    |                                                                                                                    |
| Calories      |                                                        |                                 |                                                                                                       |                                                           |             |                                                                                                                     |              |                    |                                                                                                                    |
| Strikes       |                                                        |                                 |                                                                                                       |                                                           |             |                                                                                                                     |              |                    |                                                                                                                    |
| Strikes /min  |                                                        |                                 |                                                                                                       |                                                           |             |                                                                                                                     |              |                    |                                                                                                                    |
| Total Strikes | The device collects data from all training sessions.   | Local computer memory (EEPROM)* | Stored locally on the device – until reset or deletion.                                               | Integer or floating-point value, stored in binary format. | 2 bytes     | Via computer at any time – computer memory is reset when power supply is disconnected (e.g. by removing batteries). | No           | No                 | After exceeding the maximum value, the counter automatically continues counting from 0, overwriting previous data. |

\* Data are stored locally, anonymously, and are not assigned to a specific user.
